DIGIWAY PLUS
Door automation

CDVI *Group Products*

Range: DIGIWAY

Commercial   Industrial   Public Buildings   Multi-tenant occupancy   Residential

The new DIGIWAY PLUS offers a high quality, high performance product to automate single and double swing-doors.

Using the experience gained in manufacturing the original DIGIWAY, the new DIGIWAY PLUS has many features which will enhance the whole experience of automating swing-doors - from the LCD display to step-through installation and set up, to the integral pad to programme the parameters (this can also be completed via a hand-held transmitter.

A new encoder lets DIGIWAY PLUS know the exact position of the door at all times which eliminates the requirement for a door stop. Double doors can be simply managed as being master/slave configuration, which will also control rebated doors.

As well as the simplicity to install and the high performance of DIGIWAY PLUS, there are numerous features which increases the flexibilty of the product and makes it suitable for many applications. These include:

- **Push & Go / Pull & Go**
- **Fire alarm input**
- **Night / Day mode**
- **Free open, auto-close**
- **Speed, torque & velocity adjustment**
- **Disabled entry mode**
- **Electrolock pause timer**
- **PIR/Radar "masking"**
- **Wind-stop torque adjustment**
- **Obstacle management**

- **Easy install & set up**
- **LCD display**
- **Programming via internal buttons or transmitter**
- **Inward or outward opening**
- **DDA applicable**
- **Standby battery included**
- **2-year warranty**

Technical specification

Overall dimensions	511 x 90 x 110mm
Power supply	230Vac - 50Hz
Motor power	33W
Motor voltage	24Vdc
Battery	12Vdc, 1.3AH
Weight	5Kg
IP rating	IP22
Operating temperature	-10 to +55°C
Mains fail operation	4 hours

Product codes

DWPS102S	Digiway Plus with sliding arm
DWPS102A	Digiway Plus with articulated arm
DWPS102U	Digiway Plus with both arm versions
DWSE	55mm extension shaft
