VANDAL RESISTANT KITS

One Button audio kit

One Button plus keypad audio kit

Based on the success of the 4000 series audio products, Videx have introduced a new range of aesthetically pleasing Vandal resistant 1 button audio and 1 button plus codelock kits using the front frames of the 4000 series door panels. All panels are available for flush or surface mounting and incorporate 12 SWG brushed stainless steel facia and gun metal grey alloy frame which offers substantial strength to the door panel construction.

Features:

- Low Profile Surface and flush kits available
- SPEAK and DOOR OPEN call progress LED's (DDA feature)
- Call progress reasurance tones for call and door open (DDA feature)
- Optional codelock with three programmable 4-8 digit codes
- Programmable door open time
- Dry contact timed relay output for any type of lock release
- Push to exit button input (Timed)
- Busy signal for use with multiple door systems eliminating the need for external switchers.
- Electronic call tone

Facilities:

- Crystal clear full duplex speech
- Three position call volume control at the telephone
- Large door open button and spare dry contact button on the telephone
- Up to three telephones can be connected per call button
- Larger systems available

The kits incorporate call progress LEDs' for Speak and Door Open (DDA) and reassurance tones for Call and Door Open these kits will satisfy a wide range of applications.
